Australian Council of Deans of Science

Celebrating 30 years in 2025

WIL Australia

STE(A)Ming Ahead in WIL:

Unpacking the Toolkit & Bladerunner Blueprints

Acknowledgement to Australia's First Nations Peoples.

CQUniversity recognises and acknowledges the important role First Nations peoples make to our communities, and values Australian Indigenous knowledge systems as an integral part of our teachings.

Coming to you from…

Session Overview

STE(A)Ming Ahead in WIL

2026 Online Workshop Program

🧭 1. Welcome & Framing (~10 mins)

"What's the one word you associate with WIL in STEM?"

🧰 2. Toolkit Overview (~15 mins)

Toolkit Treasure Hunt – Did you find a gold nugget?

🔍 3. Deep Dive Segments (~80 mins)

Segment 1 – Blue sky thinking for non-traditional STEM WIL placement opportunities

Segment 2 – Fix the Friction Stakeholder Challenge Solver

Segment 3 – Build your own WIL support meal and share your Recipe for Success

Segment 4 – Mix and Match Discussion for Assessment Strategies and LOs

🎯 5. Reflection & Wrap-Up (~5 mins)

"Quick wins from today?" "What's still missing that you need?"

STE(A)Ming Ahead in WIL Toolkit - ACDS Fellowship Work 2025

Utilising AI in WIL - ACDS Fellowship Work 2025

CRICOS 00213J | TEQSA: PRV12073 | RTO: 40939

Why the Bladerunner Blueprints?

Theme	Blade Runner	WIL in STEM
Identity & Authenticity	Replicants question their humanity and seek recognition as “real” beings.	Students develop professional identity, transitioning from learners to workers.
Ethics & Responsibility	Raises ethical questions about creating and controlling life.	Students face real-world ethical dilemmas in practice, fostering accountability.
Memory & Experience	Implanted memories shape replicants’ sense of self.	Experiential learning builds students’ identity and informs future practice.
Technology & Humanity	Blurs the line between human and machine; tech is both tool and threat.	Students learn to work with advanced tech while maintaining human-centered care.
Power & Agency	Replicants are controlled by corporations, denied autonomy.	WIL can empower students to act with agency within structured environments.

What's in the blueprints?

Resources to support:

- Conceptualising WIL
  - Industry onboarding survey, AI in WIL, LOs for WIL, STE(A)M inspiration
- Early Administration of WIL
- Implementation of WIL Experiences
  - Managing stakeholder expectations, assessment in WIL
- Evaluation of WIL
  - By industry directly/indirectly, by students
- FAQ
  - For students, academic staff, industry/community partners
- Utilising AI in WIL

Toolkit Treasure Hunt

Toolkit Treasure Hunt

1. Select one question of interest to you from the list in the chat.

Workshop - Treasure Hunt Activity

🧪 **Zone 4: Assessment & Evaluation**

🔍 Clue: “Uncover the table that maps WIL learning outcomes to assessment types. What’s one authentic assessment you could trial?”

📝 Task:

Match one learning outcome to an assessment strategy and explain why it fits your discipline:

Toolkit Treasure Hunt

2. Refer to the toolkit contents listing.

During Placement 98
Post Placement 99
When Things Go Awry 99
Managing Student Expectations 101
Prior to Placement 101
During Placement 101
Post Placement 102
When Things Go Awry 103
Strategy for Supporting Teams with Predominantly Introverted Students 103
Assessment in WIL 106
Managing academic requirements for WIL 107
Assessment design 107
Assessment FOR Learning (Formative) 111
Assessment OF Learning (Summative) 111
Assessment TO SHOWCASE Capabilities (Authentic/Professional) 111
Australian Assessment Practice Examples 112
Assessment FOR Learning (Formative) 112
Assessment OF Learning (Summative) 113
Assessment TO SHOWCASE Capabilities (Authentic/Professional) 114
International Assessment Practice Examples 116
Innovative International Assessment Approaches 117
Mapping of TLOs to WIL Assessment Tasks 119
Example of Community-based science communication WIL Experience 122
Assessment implementation challenges 124
Supporting Student Feedback Loops for WIL Experiences 125

🧪 **Zone 4: Assessment & Evaluation**

🔍 Clue: "Uncover the table that maps WIL learning outcomes to assessment types. What's one authentic assessment you could trial?"

📝 Task:

Match one learning outcome to an assessment strategy and explain why it fits your discipline:

STE(A)Ming Ahead in WIL Toolkit - ACDS Fellowship Work 2025

Toolkit Treasure Hunt

3. Share a gold nugget resource that can help address the question.

Mapping of TLOs to WIL Assessment Tasks

WIL Assessment Examples Mapped to Science Threshold Learning Outcomes (TLOs)

Here are examples of WIL assessment strategies that specifically align with the Science Threshold Learning Outcomes established by the Australian Learning and Teaching Council for science graduates:

TLO 1: Understanding Science

Demonstrate a coherent understanding of science by articulating the methods of science and explaining why current scientific knowledge is both contestable and testable through further inquiry.

WIL Assessment Examples:

Scientific Method Analysis: Students critically analyse the methodological approaches used in their host organisation's research or testing protocols, identifying strengths, limitations, and suggesting improvements.

Industry Practice vs. Theory Report: Students compare theoretical scientific principles learned at university with actual scientific practices observed during placement, explaining variations and their justifications.

Uncertainty and Limitations Portfolio: Students document examples from their placement where scientific knowledge was challenged, refined, or expanded, reflecting on the provisional nature of scientific understanding.

Toolkit Treasure Hunt

4. Anyone want to share a gold nugget they found?

Deep Dive – Mix & Match

Image Credit: Google Gemini

4. Deep Dive - Activity 1 Mix & Match LOs & Assessment

Assessment strategies need to effectively demonstrate appropriate learning outcomes – getting the mix and match right for your specific WIL context can be challenging.

Deep Dive – Blue Sky Thinking

Image Credit: Google Gemini

Having ‘enough’ placements is always a challenge.

Let’s consider non-traditional STE(A)M WIL opportunities.

Deep Dive – Blue Sky Thinking

Image Credit: Google Gemini

Refer to the examples from this file

5. Deep Dive - Activity 2 What Ifs

You too can do this!!!

Deep Dive – Fix the Friction

Image Credit: Google Gemini

6. Deep Dive - Activity 3 Fix the Friction

WIL involves multiple stakeholders and sometimes things don't go as well as planned.....

Deep Dive – Fix the Friction

Image Credit: Google Gemini

Your problem scenario:

"The partner is overwhelmed by admin and compliance paperwork.

They're considering withdrawing from future placements due to time burden."

Let's work through these steps together.

Identify the root cause of the challenge.

List 2–3 practical strategies to address it (use the toolkit).

Suggest one proactive action that could prevent this issue in future partnerships.

Image Credit: Google Gemini

Deep Dive – Eating up successful WIL support

7. Deep Dive - Activity 4 WIL Recipe for Success

Deep Dive – Eating up successful WIL support

Image Credit: Google Gemini

- **Starters – Pre-Placement Preparation**
- **Main Course – Implementation Supports**
- **Seasoning – Communication & Coordination**
- **Dessert – Recognition & Celebration**
- **Digestif – Evaluation & Reflection**
